STATEMENT IN SUPPORT OF REQUEST FOR REVIEW

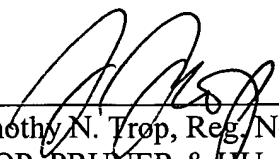

Sir:

The present application presents the relative straightforward issue of whether exchanging data is commensurate with a claim which requires transferring software. The Examiner contends that interface software is broad enough to cover mere data. The dichotomy between data, which may be operated on by software, and software, which is executable, is so clear as to preclude any reasonable assertion of the definitions espoused in the office action.

Therefore, it is requested that the rejection be overturned.

Respectfully submitted,

Date: August 25, 2005
